SUMMARY

Data professional with 4 years of experience, including 2 years in data analytics and AI/machine learning, building models and data workflows that turn complex data into actionable insight- spanning predictive modeling, generative AI, and forecasting. Skilled at translating technical findings into clear business recommendations for non-technical stakeholders and collaborating cross-functionally to drive data-informed decisions.

EDUCATION

St. John's University, Jamaica, NY - MS in Data Science, May 2026 | GPA: 3.87
Adelphi University, Garden City, NY - BA in Political Science | Honors: Cum Laude, Levermore Global Scholar

WORK EXPERIENCE

The Chum Effect, LLC (TCE)
Senior Analyst — May 2026–Present

- Deploy sentiment classification models (scikit-learn, NLTK) on client review and social data to surface reputational signals, maintaining 88% accuracy across 50,000+ records.
- Wrote automated Python scripts to clean, consolidate, and structure web and spreadsheet data across 15+ client engagements, reducing manual data prep time by ~45% for Tableau reporting.
- Partner with consultants to deliver data-driven insights and Tableau dashboards, translating behavioral trends into growth recommendations aligned with client business lifecycles.

St. John's University
Managing Editor, JCRES, Graduate Research Assistant — Sept 2025–May 2026

- Managed editorial operations across 2 journal volumes- coordinating 45 articles, ~675 author-reviewer relationships, and 3 undergraduate research assistants against publication deadlines.

Operations Analyst, Graduate Research Assistant — Jan–May 2025

- Executed data cleaning, EDA, and KPI mapping for 1,000+ research center records using Python, reducing reporting cycles by ~40% and unlocking year-on-year trend analysis.

Century Group
Data Analyst — Feb 2024-Sept 2024

- Built Power BI dashboards tracking KPIs across two offshore oil facilities for 1,000+ employees, cleaning and preparing source data with Python (pandas) and Excel and cutting weekly report prep time by 92%; reviewed weekly by the CEO.
- Conducted EDA on workforce and production data to surface operational trends for executive decision-making.

CityCode Mortgage Bank — May 2023-Dec 2023
Intern

- Identified processing discrepancies across 500+ loan application records (~10% discrepancy rate) through systematic cross-referencing and data quality checks, producing operational reports in Excel using pivot tables and data validation.

PROJECTS

- **Economic Forecasting on AWS SageMaker-** Benchmarked ARIMA, Prophet, and XGBoost to answer which architecture best predicts U.S. CPI, pivoted from LSTM after identifying architectural mismatch, and deployed the winning XGBoost on AWS SageMaker with custom inference endpoints and monitoring.
  Tools & Skills: Python, AWS SageMaker, XGBoost, ARIMA, Prophet, Feature Engineering, Time-Series Analysis
- **RAG-Based Research Assistant-** Deployed a RAG application using LangChain, ChromaDB, and GPT-4o-mini, engineering prompts to reduce hallucination and deploying via FastAPI and Streamlit.
  Tools & Skills: Python, LangChain, ChromaDB, OpenAI API, FastAPI, Streamlit, RAG, Prompt Engineering
- **Human-in-the-Loop Data Analyst-** Built a pipeline turning plain-English questions into approval-gated SQL, enforcing human review at the protocol level via OpenAI's MCP require_approval mechanism.
  Tools & Skills: Python, DuckDB, FastMCP, OpenAI Responses API, Streamlit

SKILLS

Python (pandas, scikit-learn, NLTK), SQL, R, Machine Learning, NLP/Sentiment Analysis, Time-Series Forecasting, Generative AI (LLMs, RAG), AWS SageMaker, XGBoost, Feature Engineering, Statistical Analysis, Data Visualization (Power BI, Tableau, Matplotlib, Seaborn), Excel

CERTIFICATIONS

AWS ML Engineer- Associate (Jan 2026) · AWS Certified Cloud Practitioner (2025) · NVIDIA Fundamentals of Deep Learning (2025), Databricks Fundamentals Accreditation (2025), Databricks Introduction to Apache Spark (2025)
